

“ERGO-LEAN” TOOL KITTING PROGRAM

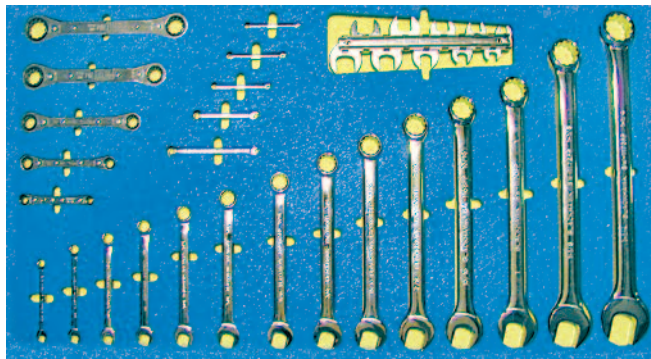

One-Stop: We are your One-Stop solution for government and industrial kitting requirements and are leaders in ergonomic customer focus, process integrity, and quality control with our exclusive “ERGO-LEAN” Tool Kitting Program.

Design Services: We evaluate your workspace and tool requirements and engineer highly productive, ease-of-use specifications to create layout designs that are driven by your mission. Contact engineering@honsatools.com for your complimentary evaluation.

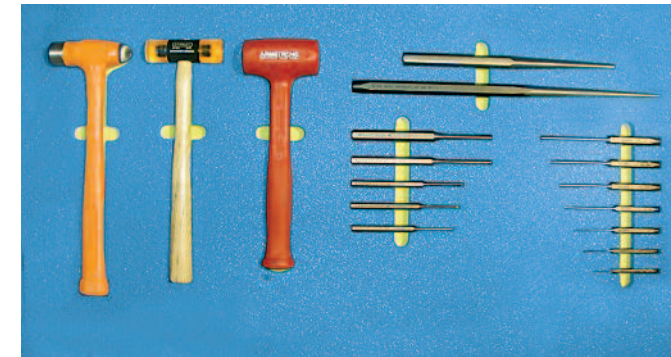

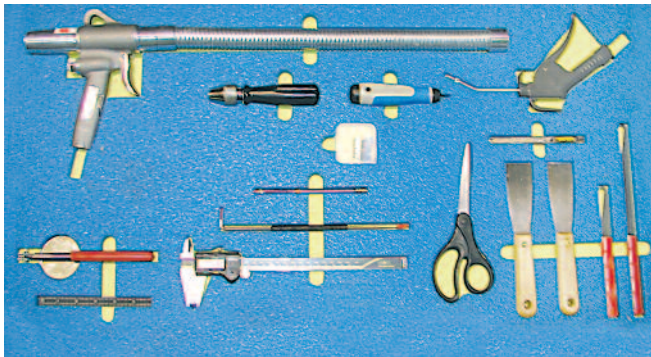

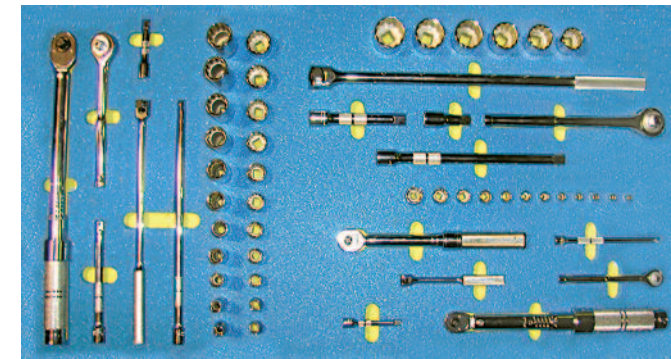

Ergonomic Efficiency: Ergonomic grouping of tools allows rapid identification and selection tailored to your work environment. Ergonomic enhancements improve safety, efficiency and productivity.

Materials: We use quality non-static/non-reactive high-density polyethylene (HDPE) foam and other component materials to fit your custom application.

Inventory Control: Our program promotes balance between inventory accountability, kit functionality, efficiency, FOD, safety and productivity.

Custom Marking: We offer laser etching of tools and tool cavities in standard numeric, bar code, UID, and customer defined etch serials.
